ASSIGNMENT 1

Instructions

- ⦿ Complete the assignment described
- ⦿ Zip all files and upload to Slate by the due date.
- ⦿ Individual work only, no collaboration allowed.
- ⦿ Mark breakdown (out of 100%):
 - 10% for proper project submission.
 - 30% for presentation (using nice graphics to make it look good).
 - 15% for home page
 - 15% for page asking user info.
 - 15% for web view page.
 - 15% for about app page

Assignment 1

- Create an iPhone app that will do the following:
 - Ask the user for their name, address, phone number, email, age (slider 0-100), gender (switch) and date of birth (date).
 - Have a submit button with an alert box thanking “name” of “email” for their time.
 - Have a home page with a button to redirect to a page asking the above information.
 - Have a second button redirecting to an about app page where you will put information about yourself.
 - Have a third button redirecting to a page with a web view opening any website.
 - All pages must have a navigation bar with a back button. (except home page).
